

**INTERNATIONAL QUALIFICATIONS  
AND ASSESSMENT CENTRE (IQAC)**

<b>Programme</b>	<b>LEVEL 4 EXTENDED DIPLOMA IN CYBER SECURITY</b>		
<b>Unit Number/ Unit Title</b>	<b>UNIT 3 NETWORK SECURITY</b>		
<b>Cohort Code:</b>	L04NWS-U3		
<b>Unit Level</b>	Level 4		
<b>Total GLH</b>	Total qualification time 200/ Total Guided learning hours 90/ Self-guided learning hours 110		
<b>Credits</b>	20 CATS/ 10 ECTS		
<b>Lecturer</b>			
<b>Start Date</b>		<b>End Date</b>	

<b>Unit Aims</b>	<p>This module is designed to provide students with a thorough understanding of network security principles and practices. It aims to develop competence in identifying and mitigating network threats and vulnerabilities to prepare students for professional roles in network security.</p>
<b>Differentiation Strategies</b> <i>(e.g. planned activities or support for individual learners according to their needs)</i>	<p>The total number of students to be in the lesson is approximately 20. This is a multicultural group of students predominantly between the ages of 24 – 45, with numerous ethnic, gender, and creed background. These are UK academic level 5 students; hence it is assumed that they have practical, theoretical, or technological knowledge and understanding of a subject or field of work to find ways forward in broadly defined, complex contexts. These students must be able to generate information, evaluate, synthesise the use information from a variety of sources. Various approaches to addressing the various identified students needs will be adopted throughout the lesson. Such will include:-</p> <ol style="list-style-type: none"><li>1. Progressive tasks</li><li>2. Digital resources</li></ol>

	<ol style="list-style-type: none"> <li>3. Verbal support</li> <li>4. Variable outcomes</li> <li>5. Collaborative learning</li> <li>6. Ongoing assessment</li> <li>7. Flexible-pace learning</li> </ol>
<b>Equality &amp; Diversity</b>	Variety of teaching techniques will be employed to ensure that the needs of each individual learner are met.
<b>Safeguarding &amp; Prevent</b>	Safeguarding policies and the Prevent duty are strictly observed to ensure the safety, well-being, and inclusivity of all students and staff.
<b>Health &amp; Safety</b>	SIRM H&S policies will be maintained.
<b>Learning Resources</b>	<b>Teaching and Learning Materials</b>
	<ul style="list-style-type: none"> <li>• Stallings, W. (2017). Network Security Essentials: Applications and Standards. Pearson.</li> <li>• Kurose, J. F., &amp; Ross, K. W. (2020). Computer Networking: A Top-Down Approach. Pearson.</li> <li>• Easttom, C. (2018). Network Defense and Countermeasures: Principles and Practices. Pearson.</li> <li>• Doyle, J. (2016). Cisco Networking All-in-One For Dummies. Wiley.</li> </ul>

Learning Outcome	Assessment Criteria
<b>LO1: Understand the fundamentals of network security.</b>	<p>1.1 : Define key concepts and principles of network security.</p> <p>1.2 : Explain the types of network threats and vulnerabilities.</p> <p>1.3 : Describe the development and trends in network security.</p>
<b>LO2: Implement security measures to protect network infrastructure.</b>	<p>2.1 : Identify and apply network security controls and protocols.</p> <p>2.2 : Configure and manage security devices such as firewalls and intrusion detection systems (IDS).</p> <p>2.3 Evaluate the effectiveness of security measures in protecting network infrastructure.</p>
<b>LO3: Conduct network security assessments.</b>	<p>3.1 Perform network security assessments to identify potential vulnerabilities.</p> <p>3.2 Analyze network traffic to detect and respond to security incidents</p> <p>3.3 Develop a report detailing findings and recommendations from network security assessments</p>
<b>LO4: Develop and implement network security policies.</b>	<p>4.1 Design network security policies and procedures.</p> <p>4.2 Implement network security policies in an organizational setting.</p> <p>4.3 Evaluate the effectiveness of network security policies and update them as</p>

No	Learning Outcome / Topic	Learning and Teaching Activities	Which assessment criteria does the session relate to?	Day/month/year/signature
1	<b>Introduction to Network Security</b>	<b>Introduction to Network Security</b> CIA Triad (Confidentiality, Integrity, Availability) in networks	LO1: Fundamentals of Network Security	
2	<b>Network Security Terminologies</b>	<b>Network Security Terminologies</b> Threats, vulnerabilities, exploits, attack vectors	LO1: Fundamentals of Network Security	
3	<b>Common Network Threats</b>	<b>Common Network Threats</b> DDoS, MITM, packet sniffing, IP spoofing	LO1: Fundamentals of Network Security	
4	<b>Network Vulnerabilities</b>	<b>Network Vulnerabilities</b> Unpatched systems, misconfigured devices, weak encryption	LO1: Fundamentals of Network Security	
5	<b>Evolution of Network Security</b>	<b>Evolution of Network Security</b> From firewalls to Zero Trust Architecture (ZTA)	LO1: Fundamentals of Network Security	
6	<b>Network Security Controls</b>	<b>Network Security Controls</b> ACLs (Access Control Lists), VLANs, segmentation	LO2: Network Security Implementation	
7	<b>Cryptographic Protocols</b>	<b>Cryptographic Protocols</b> SSL/TLS, IPsec, VPNs (OpenVPN, WireGuard)	LO2: Network Security Implementation	
8	Review	<ul style="list-style-type: none"> <li>- Review of LO1 topics</li> <li>- Practice questions and mock assessment</li> </ul>	LO1 LO2	

9	<b>Firewall Configuration</b>	<b>Firewall Configuration</b> Stateful vs. stateless, WAFs (Web Application Firewalls)	LO2: Network Security Implementation	
10	<b>Intrusion Detection/Prevention Systems (IDS/IPS)</b>	<b>Intrusion Detection/Prevention Systems (IDS/IPS)</b> Snort, Suricata, rule-based detection	LO2: Network Security Implementation	
11	<b>Endpoint Security</b>	<b>Endpoint Security</b> NAC (Network Access Control), EDR (Endpoint Detection and Response)	LO2: Network Security Implementation	
12	<b>Vulnerability Scanning</b>	<b>Vulnerability Scanning</b> Tools: Nessus, OpenVAS, Nmap scripts	LO3: Network Assessments & Monitoring	
13	<b>Penetration Testing</b>	<b>Penetration Testing</b> Ethical hacking phases (recon, scanning, exploitation)	LO3: Network Assessments & Monitoring	
14	Review	<ul style="list-style-type: none"> <li>- Comprehensive review of all learning outcomes</li> <li>- Practice questions and revision of key topics</li> </ul>		
15	Midterm	<ul style="list-style-type: none"> <li>- <b>Midterm assessment</b> covering all learning outcomes (theory and practical elements)</li> </ul>		
16	Feedback & Reflection	<ul style="list-style-type: none"> <li>- Review</li> <li>- Individual feedback on performance</li> <li>- Reflective discussion on key learning points</li> </ul>		
17	<b>Network Traffic Analysis</b>	<b>Network Traffic Analysis</b> Wireshark, tcpdump for anomaly detection	LO3: Network Assessments & Monitoring	

18	<b>SIEM (Security Information &amp; Event Management)</b>	<b>SIEM (Security Information &amp; Event Management)</b> Splunk, ELK Stack, Microsoft Sentinel	LO3: Network Assessments & Monitoring	
19	<b>Incident Response</b>	<b>Incident Response</b> NIST SP 800-61 framework, forensic triage	LO3: Network Assessments & Monitoring	
20	<b>Security Policy Design</b>	<b>Security Policy Design</b> Components: Acceptable use, BYOD, remote access	LO4: Security Policies & Governance	
21	<b>Access Control Models</b>	<b>Access Control Models</b> RBAC (Role-Based Access Control), ABAC (Attribute-Based)	LO4: Security Policies & Governance	
22	<b>Disaster Recovery &amp; BCP</b>	<b>Disaster Recovery &amp; BCP</b> RTO (Recovery Time Objective), RPO (Recovery Point Objective)	LO4: Security Policies & Governance	
23	Review	<b>Project</b> Secure a mock enterprise network (design + report)		
24	<b>Compliance Standards</b>	<b>Compliance Standards</b> ISO 27001, NIST CSF, PCI-DSS	LO4: Security Policies & Governance	
25	<b>Policy Auditing &amp; Updates</b>	<b>Policy Auditing &amp; Updates</b> Continuous monitoring, version control	LO4: Security Policies & Governance	
26	<b>Firewall &amp; IDS Lab</b>	<b>Firewall &amp; IDS Lab</b> Configure pfSense/Sophos, create custom Snort rules	LO5: Hands-On Labs & Case Studies	
27	<b>VPN Setup</b>	<b>VPN Setup</b> Site-to-site and remote-access VPN implementation	LO5: Hands-On Labs & Case Studies	

<b>28</b>	<b>Attack Simulation</b>	<b>Attack Simulation</b> MITM with Ettercap, DDoS mitigation	LO5: Hands-On Labs & Case Studies	
<b>29</b>	Final Exam Preparation & Review	LO1, LO2, LO3, LO4	LO1, LO2, LO3, LO4	
<b>30</b>	Final Exam		LO1, LO2, LO3, LO4
